Company Policy

Environmental Policy Statement

RE:Group (UK) Ltd is committed to reducing or eliminating any negative impact its activities may have on the environment and to controlling and avoiding pollution.

It is the company's strategy to ensure it meets or exceeds the requirements of the Environmental Protection Act 1990 and all other relevant legal requirements, codes of practice and regulations.

In order to prevent potential pollution to air, land or water and provide opportunities for continual improvement our management systems and work practices are continuously monitored. This ensures we meet the requirements of our site licence and provides the framework for setting and reviewing our annual environmental targets and objectives.

Our staff are trained to an appropriate level to allow them to carry out their work tasks effectively with due consideration to their safety and possible environmental implications. All equipment and vehicles are regularly maintained to ensure efficient running with minimal potential waste. The company's buying policy takes into account potential environmental impact and an energy management policy is in place and maintained.

It is the policy of the organisation to continue to monitor the environmental impact of its activities. The organisation is committed to the efficient use of resources, including energy generation and water consumption. The company implements a strategy to minimise waste by evaluating operations and ensuring they are as efficient as possible.

This statement is reviewed by senior management as part of a documented management review process.

Signed.....

Date: February 2012

Mr R Booth
Production Director
